

Vinay Reddy Patil

Full-Stack Developer — AI Applications

✉ vinayrpdev@gmail.com  GitHub  LinkedIn  Portfolio  Blogs

SUMMARY

Full-stack developer building practical web products with modern frontend, backend, database, and AI technologies. Experienced in shipping end-to-end applications with authentication, third-party APIs, realtime updates, and human-in-the-loop AI workflows.

EDUCATION

Sir M. Visvesvaraya Institute of Technology Bengaluru, India
Bachelor of Engineering in Computer Science 2024 – 2028

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C, C++
Frontend: React, Next.js, HTML, CSS, Tailwind CSS, Vite
Backend and Data: Node.js, Bun, Express, PostgreSQL, MongoDB, Drizzle ORM, Mongoose
Integrations: Corsair, Gmail API, Google Calendar API, OAuth, Webhooks, Server-Sent Events, REST APIs
AI: AI Agents, LLM APIs, Google Gemini API, Human-in-the-Loop Workflows
Tools: Git, GitHub, VS Code, Linux, Vercel, Render

PROJECTS

NovusMail - AI-Powered Gmail and Calendar Command Center

- Built a unified workspace that lets users triage Gmail, read and respond to threads, manage their calendar, and keep email context visible while scheduling meetings.
- Added keyboard-driven commands and an AI copilot for inbox search, thread summaries, reply drafts, and calendar proposals, with user confirmation required before external actions.
- Integrated Gmail and Google Calendar through Corsair plugins with tenant-scoped OAuth workspaces, cache-first PostgreSQL reads, Drizzle ORM, webhooks, Server-Sent Events, and polling fallback.
-  Live Demo  Source Code

Project Ghost - AI-Assisted Accountability Platform

- Built a collaboration platform that makes invisible work visible in college group projects through lightweight daily updates, contribution timelines, and project workspaces.
- Implemented email authentication with HTTP-only JWT sessions, project invitations, membership controls, contribution categories, anonymous peer reviews, and project archiving.
- Integrated Google Gemini for neutral team reflections and private coaching with local fallbacks, then deployed the React frontend on Vercel and Bun/Express API on Render with MongoDB.
-  Live App  Source Code

ACHIEVEMENTS

- Placed 8th nationwide in the ChaiCode Hackathon with NovusMail.
- Placed 4th in HackBuzz, conducted by NCET Bengaluru, with Project Ghost.
- Published 14+ technical articles covering JavaScript, networking, browsers, and developer tools.
